

Projecting Responses of Ecological Diversity In Changing Terrestrial Systems (PREDICTS)

Project funded by the Natural Environment Research Council (NERC).
Principal Investigator: Prof. Andy Purvis.

Data Entry Form – version

This form is intended for capturing quantitative data on the abundance or density of terrestrial wildlife populations worldwide from published literature and other sources, for incorporation in a database that will be used to model how local biodiversity responds to multiple human threats. Imperial College, UNEP-WCMC and their employees assert no intellectual property rights to the data that is made available for inclusion in the database. Authors and/or providers of the original material retain all the intellectual property rights for this material, whether in its original or re-formatted form. Authors and/or data providers of the original material will be acknowledged in any derived products and publications that use their materials. No intellectual property rights in the database materials are granted to any user of the database.

Form compiler comments:

For the source ID generating, type 1st author / data provider's surname
in the field below, **USING STANDARD LATIN CHARACTERS ONLY:**

For NON-TYPICAL DATA SOURCE submitted together with the form –
please attach zip-archive and provide file name here:

Source ID:

Abstract (copy from the publication):

Main Locations of data within the publication (page/s, table/s, figure/s):

If functional trait data are available, give file name/s below:

Study sequential number:					
Study working title:					
Study extent/coverage:					
Location, as described by author:					
Continent / region:					
Country/ies:					
Sub-national unit/s or geographical name:					
If study area map attached – record file name here:					
If GIS data provided by authors, attach zip-archive and type the file name here:					

Geographical coordinates for the approximate centre of each study area:

A. Latitude and Longitude in Decimal Degrees					
Latitude (Y, negative for the southern hemisphere!):					
Longitude (X, negative for the western hemisphere!):					
B. Latitude and Longitude in Degrees, Minutes, Seconds (NOT REQUIRED IF coordinates in Decimal Degrees are available)					
	deg. min. sec.	deg. min. sec.	deg. min. sec.	deg. min. sec.	deg. min. sec.
Latitude (dd/mm/ss and North or South):					
Longitude (ddd/mm/ss and East or West):					
Coordinates acquisition method:					
Indication on location precision, as estimated by the form compiler:					

Census or sampling method (uniform within a study):

Select census/sampling method or add new one:					
Select abundance metric type or add new one:					
Select abundance metric unit or add new:					
Select sampling effort unit or add new:					

Period covered by the study and additional information:

Start (YYYY-MM-DD):					
End (YYYY-MM-DD):					
Number of sites within the study:					
Number of species, taxa or groups of species sampled:					
Compiler's comments:					

Take-down Policy.

The PREDICTS project operates a ‘take-down’ policy, such that if we are notified of a potential breach of copyright, or a possible violation of any law (including but not limited to laws on copyright, patent, intellectual property, trademark, confidentiality, data protection), the complete dataset or relevant portion will be removed from the database as quickly as possible pending further investigation.

Where the grounds for complaint are found to be valid, the complete dataset or relevant portion will be permanently deleted.

If you have discovered any material in the PREDICTS database which you consider to breach copyright or any other law, please contact enquiries@predicts.org.uk with the following information:

- o Your contact details.*
- o The details of the dataset or relevant portion of the dataset.*
- o The nature of your complaint or concern.*
- o An assertion that your complaint is made in good faith and is accurate.*
- o If you are complaining about breach of your own copyright or other intellectual property right, please also confirm that you are the rights owner or are authorised to act for the rights owner.*
